

**Amendments to the Specification:**

Please make the following amendments to the specification. Material to be inserted in replacement paragraphs or sections is in **bold and underline**, and material to be deleted is in ~~strikeout~~ or (if the deletion is of five or fewer consecutive characters or would be difficult to see) in double brackets [[ ]].

Please replace the paragraph beginning at page 2, line 29, with the following rewritten paragraph:

Printer 10 may include a media tray 12, a feed roller 14 and a toner fuser 16. Feed roller 14 may feed a media sheet S along a **media** feed path P, as indicated by arrow P. Feed path P may be defined as the path media such as media sheet S travels along while being fed through printer 10. Therefore, **media** feed path P may be delineated by the width of media sheet S. The speed of toner fuser 16 and other operational characteristics of the components of printer 10 may be controlled by a processor such as microprocessor 18, typically based on the type of media as determined by the media identification system described herein.
